HISTORY

2007 - THE BEGINNING

The launch of Bliz Active and our first style, Pursuit.

2008 - XC-SKIING

Bliz Active had its first major breakthrough together with Charlotte Kalla when she won the Tour De Ski.

2010 - VANCOVER OLYMPICS

Bliz Active was seen and cherished around to world thanks to the Nordic XC-Ski stars and their performances in the Vancouver Olympics. Winning 15 medals wearing Bliz eyewear.

2011 - GOGGLES & SKI CROSS

Bliz launched its first own ski goggle and signed a new collaboration with the Swedish Ski Cross Team. Still going strong together.

2014 - ALPINE SKIING

2014 is the year when Bliz entered the big stage and started to be seen in the major Alpine arenas around the world.

2015 - FIS APPROVED HELMET

A major step in our product development took place in 2015 when we launched our first FIS certified helmet. Although great, we are not satisfied, we will continue to push the limits regarding safety, design and function.

THE EXPANSION

LETS CONQUER THE WORLD

CORE VALUES

DESIGN

Swedish design which is at the cutting edge in function, technology and appearance. Carefully developed, quality-assured products which meet the necessary standards and requirements.

FLEXIBILITY

High technical and functional level. The product's functionality and the accessories available combine to provide an unbeatable versatility and flexibility.

VALUE

Bliz Active's advantageous pricing, along with the flexibility of the products and the accessories which are included in the price or can be purchased separately, provide unbeatable value for consumers.

ATTACHABLE HEAD STRAP

Make sure that your glasses stays in place with the adjustable neck strap

ATTACHABLE SWEAT BAR

Change appearance and functionality of the glasses with the detachable sweat bar

CHANGEABLE LENS

Change the lens according to weather conditions

ADJUSTABLE TEMPLES

Customize you glasses with the adjustable friction rubber temples for best fit

ADJUSTABLE NOSE PAD

Customize you glasses with the adjustable friction rubber nose pad for best fit

TECHNICAL ADVANCED SPORTS GLASSES

PROTECT YOUR EYES

Your glasses should not only protect your eyes from dangerous UVA and UVB rays, but they should also protect your eyes against wind, dust, bugs, rain, snow, sleet and anything else that you may encounter. It is therefore important that your sports glasses have both great fit and complete eye coverage. Bliz Active eyewear comes in a multitude of frame sizes allowing a perfect fit option for any, and every face.

STAY IN PLACE COMFORTABLY

Your sport glasses should not move about during your activities. If they do, they could cause irritation on the skin, obstruct vision and worst of all, become a distraction from your sport rather than an aid to your sport. Bliz Active eyewear come with patented click-in slip-proof straps, infinitely adjustable rubber temples and nose pieces. This means that your Bliz eyewear can stay comfortably in the perfect place with no slippage, to only enhance your performance.

UNOBSTRUCTED VISION

For maximal safety and top performance it is important that your glasses do not obstruct your vision and only enhance it. Bliz Active eyewear come in a multitude of frame configurations (and sizes) allowing a perfect fit option for any and every face. Several models come with frameless designs for unobstructed 360 degree vision. Others come with half frames and extra high brows. Bliz also offers an endless amount of interchangeable shades and unbreakable precision lens sets suited to maximize vision in the widest variety of different weather conditions. Bliz Active complies with standards EN ISO 12312-1, AS/NZS 1067 & ANSI Z80.3.

LIGHT WEIGHT

To ensure maximum mobility for the head and minimum tension in the neck, Bliz Active eyewear are superlight often weighing only about 25 g., up to 40% less than other brands.

« BLIZ LENS TECHNOLOGY™

All Bliz Active glasses are equipped with Bliz Lens Technology to deliver precision lens sets of the highest optical standards. The materials and manufacturing techniques selected provide maximum safety and clarity, even in the toughest conditions. Whether it's an easy morning run through the woods, a daylong bike ride over a mountain pass, or a rapid descent down a snowy Nordic ski trail at sundown, Bliz Active lenses will keep you focused.

All Bliz Active lenses are made with Bliz X-PC, the virtually unbreakable Polycarbonate that complies with standard EN ISO 12312-1, AS/NZS 1067 and ANSI Z80.3 standards for high-mass and high velocity impact. This state of the art lens material also delivers a 100% filter from harmful UVA and UVB rays. Additionally all Bliz Active lenses are molded with Bliz Perfect Curve Technology™ to

provide no breaks or distortions in your visual field.

We offer four lens series' within which come with a multitude of lens shades. Bliz Ultra Lens Science™ is our top-end lens type. Precision lens Technology™ with the most exacting refraction tolerances. Bliz Hydro Lens System™ is our intermediate model. Bliz Fusion Lens Tech™ is our standard lens. A fourth lens type, Bliz Opti Lens Technology™, is a little special as it upgrades our Bliz Fusion Lens Tech™ with magnified vision for hard-to-read products such as cycle computers and cell phones.

Bliz Lens Technology delivers the highest quality solution for any weather, every light, all terrains and every speed so you can keep focused on what's ahead.

**Bliz Ultra Lens Science™** is the ultimate in lens technology. It delivers perfect vision in most every environment by bringing the longest list of features together for the first time anywhere. ANTI-FOG, PHOTOCROMATIC, PRECISION CURVE, MAX UV-PROTECTION, OLEOPHOBIC, MULTICOATING, ANTI-WATER, NANO HARD COATING, X-PC SHATTER PROOF and more are all in this proprietary unique Bliz lens.

**Precision Lens Technology™** delivers lenses with the most exacting refraction tolerances and complies with the most demanding safety standard. With their distortion-free field of view these lenses let your eyes relax and focus. In addition, all eyewear with Precision Technology also feature our PRECISION CURVE, MAX UV-PROTECTION, X-PC SHATTER PROOF, ANTI-WATER, ANTI-SCRATCH and when desired Multicoating or Polarized in one great lens.

**Bliz Hydro Lens Technology™** is our intermediate lens type. It delivers PERFECT CURVE, MAX UV-PROTECTION, X-PC SHATTER PROOF, HYDROPHOBIC, ANTI SCRATCH and when desired Multicoating or Polarized in one great lens.

**Bliz Fusion Lens Tech™** is the standard lens in the Bliz Active product line. It delivers PERFECT CURVE, MAX UV-PROTECTION, SHATTER PROOF and when desired Multicoating or Polarized in one lens.

**Bliz Opti Lens Technology™** provides lenses designed to keep you focused on your digital self while on the go. It delivers discreet magnified (+0.5, 1.0 2.0) vision in the lower portion of Bliz Fusion Lens to enhance the reading of cycle computers, cell phones and other small text items that are near at hand.

MATRIX

With its characteristic frame and aerodynamic full lens shape, Matrix is the ideal sport frame for medium to high speed sport activities. Matrix has an uncontrollable appeal and features designed to protect the eyes from the sun, wind and air-borne particles while also delivering controlled air circulation to combat lens fogging and cool a sweating face. Matrix is the new everyday eyewear in sports and more casual occasions.

Matrix is a unisex frame. It weighs only 34 grams and has a Hydro Lens Technology™, which features our perfect curve, max UV, shatter proof, hydrophobic and anti-scratch technologies.

PRIME

Handmade frame with perfect fit for regular faces. Prime is the ideal sport frame for medium to high speed sport activities. Every feature and line are designed to help you protect the eyes from the sun, wind and air-borne particles while also delivering controlled air circulation to combat lens fogging and cool a sweating face. Prime is perfect for the widest range of activities including running, Cross-Country Skiing, paddling, SUP, hiking and climbing.

Prime is a unisex frame. It weighs only 26 grams and has a Hydro Lens Technology™, which features our perfect curve, max UV, shatter proof, hydrophobic and anti-scratch technologies.

WHAT TO WEAR

Bliz Active offers glasses for all occasions and different sports. The big range of Bliz Active products can sometimes make the choice of glasses difficult for the consumers. What should you consider when choosing frames?

The most important thing when you buy a pair of Bliz sports glasses is that they fit comfortably on the face. Nearly all glasses are adjustable in both the nose and temple to enable the best fit. A perfect fit is crucial in your choice of glasses.

The glasses are usually made and designed according to a specific sport. When choosing glasses for the first time try one of the glasses that are designed for the desired sport. Lets say you want glasses for cycling, then you may want to try one of our cycling glasses. If the glasses made for cycling wont fit for some reason, then try another style. A correct fit is always the most important aspect when choosing glasses.

Smallface/Junior

All of the most common styles i the Bliz Active assortment comes with a smallface version. The smallface version are made with a narrower frame size. Most kids can fit the smallface version as well. If you know for a fact that you

have a smaller face, smallface are probably the correct choice for you.

OTG (Over the Glasses)

If you usually wear glasses, there are 3 different options that would make life easier with sports glasses.

Option 1:

We provide prescription glasses using your own prescription from the optician. [www.bliz.com/optical](http://www.bliz.com/optical)

Option 2:

Offer glasses and frames that works over your regular glasses.

Option 3:

Provide an optical adapter. The optical adapter is available as an accessorie for your glasses. Grind the adapter at your local optician.

WHY BLIZ ACTIVE SPORTSGLASSES

- ✓ Extremely low weight
- ✓ Optimal fit thanks to adjustable nose pad and temple tips
- ✓ Development of products are made together with the elite of cross country skiing, cycling and running.
- ✓ Protect your eyes from the sun's harmful UV rays, wind, dust, insects, rain and snow, etc.
- ✓ Unbreakable X-PC lenses with perfect refraction, color and contrast rendition.
- ✓ Design and development in Sweden.

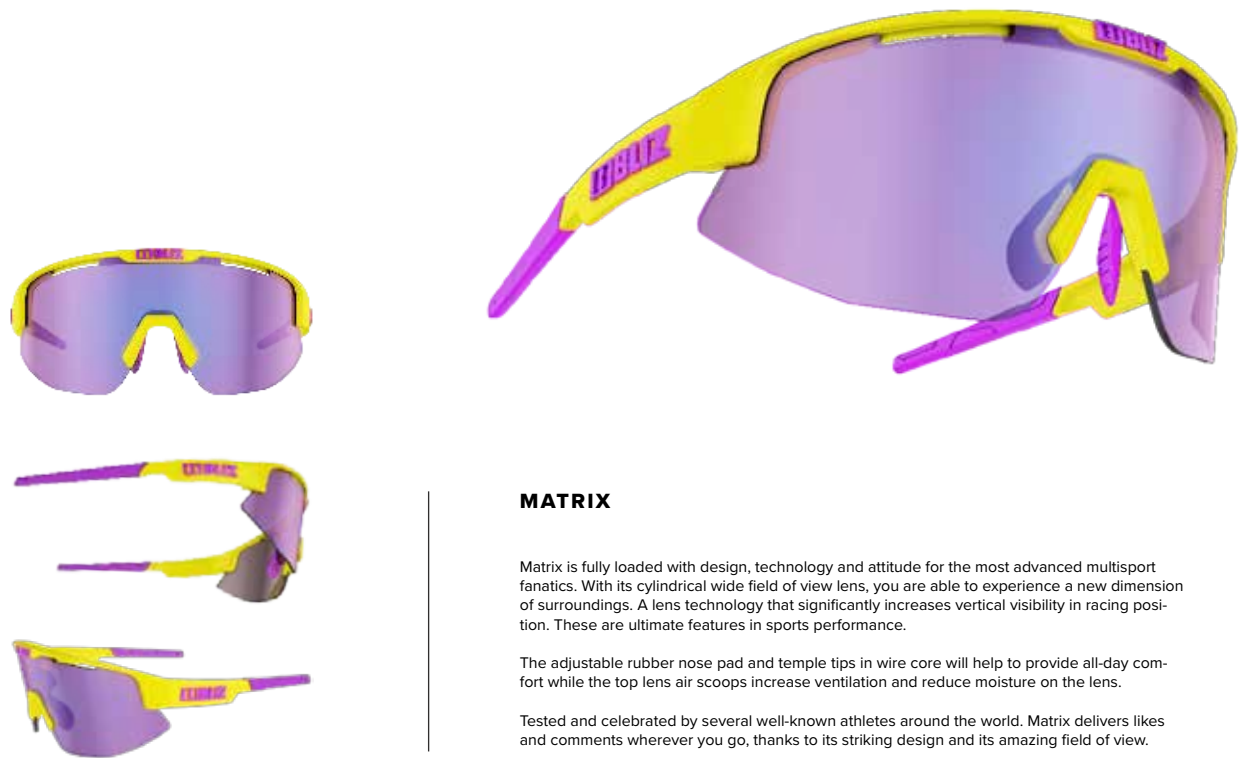

**BLIZ ACTIVE**

Performance vision made available for everyone. Because of the harsh and changing weather conditions in the North, we had to make an effort for the active life community, Bliz was founded in 2007. Ever since the beginning we have been forced to push the limits towards a secure and clear view in the most demanding environment.

TEAM VELO CONCEPT CYCLISTS WEARING DEFENDER AND TEMPO

MATRIX

Matrix is fully loaded with design, technology and attitude for the most advanced multisport fanatics. With its cylindrical wide field of view lens, you are able to experience a new dimension of surroundings. A lens technology that significantly increases vertical visibility in racing position. These are ultimate features in sports performance.

The adjustable rubber nose pad and temple tips in wire core will help to provide all-day comfort while the top lens air scoops increase ventilation and reduce moisture on the lens.

Tested and celebrated by several well-known athletes around the world. Matrix delivers likes and comments wherever you go, thanks to its striking design and its amazing field of view.

### SPRINT

Versatility, design and fit are the outstanding features that make it easy to fall in love with Sprint. The glasses are made of the high quality material TR90 providing very lightweight and flexible properties. The model is equipped with an unbreakable X-PC lens with the best anti-fog and 100% UVA and UVB protection.

Sprint is delivered with an extra contrast lens, 20mm adjustable headband, soft and adjustable temple ends and nose piece. The unique lens shape also helps to prevent fogging by creating perfect air circulation behind the lenses. Sprint is a senior model designed to fit normal and large faces. Bliz Sprint is very well suited for cross-country skiing, cycling and running, but also works well for other sports.

RAPID

The Rapid small-face frame, lens shape and off the face positioning make it ideal for medium speed activities where keeping focused means protecting the eyes from the sun, wind and air-borne particles while also delivering controlled air circulation to combat lens fogging and cool a sweating face. Rapid is perfect for the widest range of activities including running, cross-country skiing, paddling, SUP, hiking and climbing.

Rapid is designed for smaller faces, weighs only 26 grams and is an advancement of the massively popular Pace. Its soft, infinitely adjustable nosepieces and temples allow for custom fit and fine tuning of circulation. Each hard shell Rapid kit comes with both bright light and low light Perfect Curve lens sets (or universal ULS lens), cleaning cloth, a removable sweat-brow, plus Bliz's famous click-in goggle type head band.

HYBRID

The Hybrid frame, lens shape, high and close-to-the face positioning make it ideal for high speed activities where keeping focused means shielding the eyes from sun, wind and air-born particulates while delivering perfect unobstructed vision in every body position and speed.

Hybrid is ideal for the demands of cyclists, speed skaters and other high speed, back down, heads up sports due to its maximized sun and air deflection and high frame positioning. It is also great for those in medium speed sports who seek minimal airflow over their corneas. Its soft, infinitely adjustable nosepieces and temples allow a custom fit and a fine tuning of circulation.

Hybrid weighs only 29 grams. Each hard shell Hybrid kit comes with Perfect Curve bright light, low light, and clear lens sets (or universal ULS lens), cleaning cloth, plus the ability to add Bliz's famous click-in goggle type head band and Bliz Opti Lens magnified computer reader lens.

# HYBRID SMALLFACE

## PRODUCT OVERVIEW

### HYBRID SMALLFACE

The Hybrid Smallface frame, lens shape and high and close-to-the face positioning makes it ideal for high speed activities where keeping focused means shielding the eyes from sun, wind and air-born particulates while delivering perfect unobstructed vision in every body position and speed.

Hybrid Smallface is ideal for the demands of small-faced cyclists, speed skaters and other high speed, back down, heads up sports but due to its maximized sun and air deflection and high frame positioning. It is also great for those in medium speed sports who seek minimal airflow over their corneas. Its soft, infinitely adjustable nosepieces and temples allow a custom fit and a fine tuning of circulation.

Hybrid Smallface weighs only 26 grams. Each hard shell Hybrid Smallface kit comes with Perfect Curve bright light, low light, and clear lens sets, cleaning cloth, plus the ability to add Bliz's famous click-in goggle type head band and Bliz Opti Lens magnified computer reader lens.

TEMPO

Tempo is the sunglass you forget you have on. It is both the lightest Bliz model and the model that rides closest to the face. It is also the model that has the most integrated strap for face hugging security.

Wear the 24 gram Tempo Smallface with its soft infinitely adjustable temples for perfect vision in road cycling, road running and triathlon. You can also remove the temples and snap in the strap to convert the glasses into a face hugging "goggle" for sports with greater upper body motion like paddling, trail running, cross country skiing or even mountain biking. Click in the sweat band when needed to stop sweat from trickling down your face. With the strap on, it is one of the lowest profile eyewear available and perfect for those who seek minimal airflow over their corneas.

Tempo comes with a bright light and a low light lens set, cleaning cloth, and its 20mm strap and sweat band.

# TRACKER OZON

## PRODUCT OVERVIEW

### TRACKER OZON

Tracker Ozon's unique frame, personalization and versatility make it as likely to be worn while Alpine Touring as when relaxing at a sidewalk café.

The Ozon takes the best of Bliz's award winning Tracker; its removable Jaw Bone, click-in goggle type head band, adjustable nosepieces and temples. Use Tracker with Jaw Bone for full frame look or without Jaw Bone for 1/2 frame personalization depending on your taste.

Tracker Ozon can be had with bright light and a low light Perfect Curve lens kits, a Gold Polarized lens, or the Universal ULS lens and weighs only 31 grams.

## PRIME PRODUCT OVERVIEW

### PRIME

The simplicity, versatility and near universal fit makes Prime one of our favorites. Its soft friction rubber nosepiece and its friction rubber temples allow for lightweight comfort. Prime weighs only 26 grams and fits either close to your face for wind deflection in steady speed sports or slightly farther off the face for ventilation needed in shifting speeds sports like cross country skiing.

Prime comes with a soft microfiber case.

## ALTITUDE PRODUCT OVERVIEW

### ALTITUDE

When safety comes first. Altitude is an innovative and technically advanced glacier frame for use in very strong sunlight. It will take you to new places and higher grounds.

Altitude is made of High Impact PC and comes with unbreakable X-PC lenses with 100% UVA and UVB protection. The lenses are equipped with the best anti-fog protection and comes with a filter category 4 lens for extra strong sunlight on high altitudes. As an insurance the included nec cord prevents the glasses from falling of you neck.

Altitude is a unisex model and is suitable for both small and normal sized faces.

## SNOW VISOR PRODUCT OVERVIEW

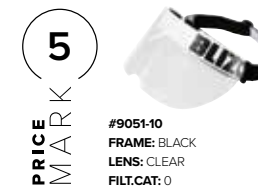

### SNOW VISOR

Bliz Snow Visor is a snow shield that effectively protects against annoying snowfall. Snowfall often expose unnecessary strain for the eyes with poor visibility as a result.

Snow Visor has been designed to be simple in construction and instead sit light and fine on the head . With its adjustable strap, you can set the screen completely as desired.

The snow visor feature a soft foam on the inside for a comfortable fit against the face when you go short as well as long distances. Snow Visor is optimal for cross-country skiing but also good for other winter sports where snowfall is an obstacle.

**BLIZ ULTRA LENS SCIENCE™**

## **NINE FEATURES. ONE LENS.**

We keep pushing the limits towards perfection every day. Our latest achievement is Bliz Ultra Lens Science™ - A truly spectacular lens concept which provide top performance and optical quality by adding nine important features in one single lens.

ULS™ delivers perfect vision in most every environment by bringing the lonest list of features together for the first time anywhere. Oleophobic, Hydrophobic, Anti-scratch, Photochromatic, Anti-fog, Multicoating, Shatter proof, Max UV-protection and Perfect curve are all in this proprietary unique Bliz lens.

## ULS™ LENS TECHNOLOGY

All ULS™ lenses are equipped with Bliz Lens Technology™ to deliver precision lens sets of the highest optical standards. The materials and manufacturing techniques selected provide maximum safety and clarity, even in the toughest conditions.

Bliz ULS™ lenses are made with Bliz X-PC™, the virtually unbreakable lens that complies

with European Standard 174:2001 for high-mass and high velocity impact. This state of the art lens material also delivers a 100% filter for harmful UVA- and UVB rays.

Bliz Ultra Lens Science™ delivers the highest lens quality for any weather, every light, all terrains and every speed so you can keep focused on what's ahead.

## UNIQUE LAMINATED SINGLE LENS

Through intensive research and careful tests we have succeeded to further develop the traditional double lens into one high-tech laminated single lens.

Bliz ULS™ goggles deliver 9 unique lens features. **All in one single lens.**

## SAFETY STANDARDS GOGGLES

Bliz Ultra Lens Science™ is the ultimate in lens technology. It delivers perfect vision in most every environment by bringing the longest list of features together for the first time anywhere.

The lens's **Photochromatic** self-adjusting properties based on light intensity and UV light provide the best view in the ski slope with an automatic adjustment between filter categories 2 and 3.

Bliz ULS™ goggles have a truly unique **Anti-fog** film on the inside of the **laminated single lens** that gives almost 4 times better fog protection than a traditional double lens.

A double lens risk creating a certain refraction of the light beam into the air barrier between the 2 lenses. Bliz ULS™ single lens simply eliminates this problem and gives no refraction (Perfect curve).

Bliz ULS™ also provides features such as **Hydrophobic, Anti-scratch, Oleophobic, Multicoating, Shatter proof and Max UV protection**. A total of 9 properties in one single lens.

## SAFETY STANDARDS SPORTS GLASSES

All ULS™ glasses are equipped with Bliz Lens Technology™ to deliver precision lens sets of the highest optical standards. The materials and manufacturing techniques selected provide maximum safety and clarity, even in the toughest conditions.

Bliz ULS lenses are made with Bliz X-PC™, the virtually unbreakable Polycarbonate that complies with EN ISO 12312-1:2013, AS/NZS 1067:2003/AMDT 1:2009 & ANSI Z80.3:2010 for high-mass and high velocity impact. This state of the art lens material also delivers a 100% filter for harmful UVA- and UVB rays.

Bliz Ultra Lens Science™ delivers the highest lens quality for any weather, every light, all terrains and every speed so you can keep focused on what's ahead.

## LENS FEATURES SPORTS GLASSES

### PHOTOCHROMATIC

The lens changes its shading automatically and instantly from light to dark and back again based on the weather condition.

### ANTI-SCRATCH

This drastically reduces the appearance of thin hairline scratches, keeping your lenses in perfect shape longer.

### HYDROPHOBIC

The hydrophobic coatings keep rain, snow and water drops off the lens.

### ANTI-FOG

Eliminates condensation and moisture on the lens, ensuring optimal fog free visibility in every condition.

### SHATTER PROOF

Unbreakable lenses to resist impacts without causing any damage to your eyes.

### OLEOPHOBIC

This greatly helps keeping the lenses clean from dirt and oily stains.

### UV PROTECTION

The filter blocks harmful UVA- and UVB rays from reaching your eyes.

### MULTICOATING

Providing a minimizing effect of glare and giving you perfect visual qualities in the most demanding situations.

### PERFECT CURVE

Every lens is cut out with perfection and accuracy providing minimized distortion in the field of view.

**BLIZ GOGGLES**

30 years in the optical fashion industry. A lifetime of nothern lights, harsh and brutal enviroments. Tested and approved by the real natives of Scandinavia. Experience built this brand. Used by professionals and praised by fashion designers all over the world.

**WORLD CHAMPION SANDRA NÄSLUND WEARING EDGE & RAID**

BLIZ GOGGLES NEWS

Nova is a pair of unisex goggles with a perfect balance between design and functionality. Through careful development and product testing with our ski teams, we have managed to create goggles that delivers security and performance in the absolute top class. Nova has been designed with a wide field of view and a flexible system to easily switch between different lenses. Nova has also been optimized for perfect comfort through 3 layers of foam with soft fleece against your face. The goggles also have flexible side clips and an adjustable 40mm strap with silicone for optimal fit and secure positioning on the helmet while skiing.

NOVA

WHY BLIZ GOGGLES

- ✓ OTG Goggles - Fits over your regular glasses.
- ✓ Compatible with most helmets on the market.
- ✓ The best anti-fog available on the market.
- ✓ The wide range of products makes it easy and suitable for everyone, both in price and performance.
- ✓ Development of products are made together with the national teams in Alpine Skiing & Skicross.
- ✓ Designed and developed in Sweden

WHAT TO WEAR

Bliz offers ski goggles for all occasions and different sports. The big range of Bliz products can sometimes make the choice of helmet and glasses difficult for the consumers. What should you consider when choosing protection?

The most important thing when you buy goggles and helmets is that they fit comfortably on the face and head. Try the goggles and helmet and find the correct size. The match between goggles and helmet should be perfect in the breakpoint of the forehead. Use a Bliz helmet together with Bliz goggles for best result.

Bliz have a wide range of sizes and styles. Senior/Small Face/ Junior/Kids/Baby and OTG.

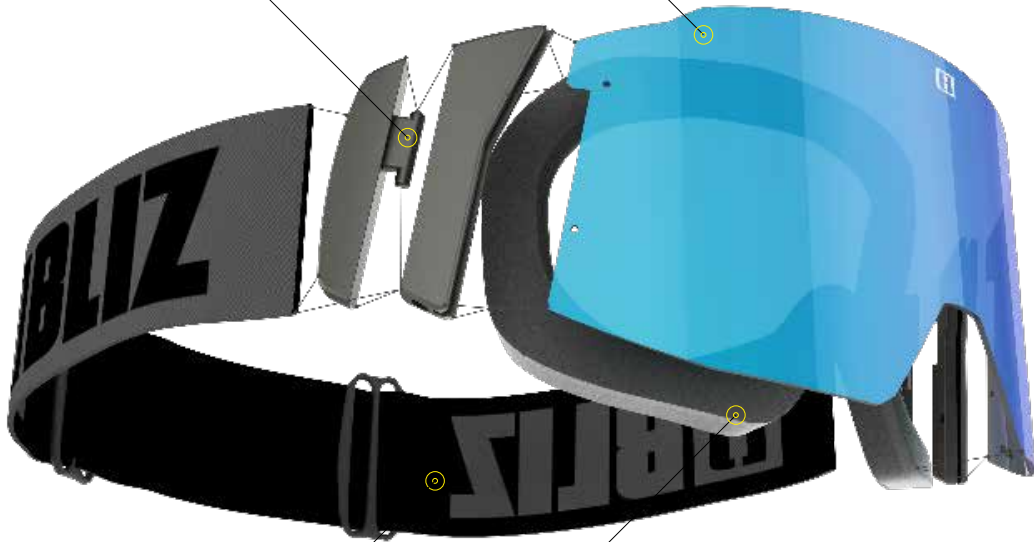

Bliz offers multiple goggles with changeable lenses. In order to get the best available vision you need to adapt your goggles according to weather conditions. Talk about the benefits of using different lenses. Ideally, the customer shall have one lens for light and one lens for dark conditions. This provides additional sales and more satisfied customers.

FLEXIBLE SIDE CLIPS

The flexible side clips makes the goggle fit perfect with helmets

DOUBLE LENS WITH ANTI-FOG TREATMENT

A double lens is the key feature for a fog-free vision

Three layer foam

For a comfortable and gentle fit.

Adjustable silicone strap

Makes sure that your goggle stays in place comfortably

TECHNICAL ADVANCED SPORTS GOGGLES

PROTECT YOUR EYES

Your goggles should not only protect your eyes from dangerous UVA and UVB rays, but they should also protect your eyes against wind, dust, bugs, rain, snow, sleet and anything else that you may encounter. It is therefore important that your sports goggles have both great fit and complete eye coverage. Bliz goggles come in a multitude of frame sizes allowing a perfect fit option for any and every face.

STAY IN PLACE COMFORTABLY

For both maximal safety and top performance, it is important that your glasses do not obstruct your vision but enhance it. Bliz Active eyewear come in a multitude of frame configurations (and sizes) allowing a perfect fit option for any and every face. Your goggles should not move about during your activities. If they do, they could cause irritation on the skin, obstruct vision and worst of all, become a distraction from your sport.

Bliz goggles comes in many styles and variations. Always consider multiple layers of foam, adjustable strap, flexible side clips and silicone strap for perfect fit.

UNOBSTRUCTED VISION

Choose goggles with double lenses that discourage condensation from forming when the warm air of your breath makes contact with the cold lens. The anti-fog coating inside the goggles helps, while vents along the sides, top and bottom clear the warm air out of the inside of the goggles. Bliz goggles is always designed with a great ventilated frame to prevent the goggles from fogging up. The inner lens is made of Acetate, with the best anti-fog on the market. All Bliz goggles complies with European standard 174:2001.

LIGHT WEIGHT AND EASY TO WEAR

The frames are made of flexible and light weighted PU-material. This material is easy to bend even in cold weather conditions.

# STRONG SUNLIGHT

For bright conditions

### NOVA

As a racer, you need the full-view experience! Nova is the result of many years of testing, racing and brainstorming together with the world's best athletes. Nova's unique frame is designed to maximize your field of view, especially in the vertical axis. Don't miss out on anything, whether it is vertical or horizontal.

Nova is equipped with a X-PC double lens for maximum anti-fog and durability. The 40mm adjustable head strap comes with silicone for a safe and comfortable placement on the helmet. The three layers of soft foam makes the PU goggle frame feel comfortable and gentle to the skin.

If you're an all-day regular glasses wearer, Nova is what we call an OTG (Over the glasses) ready frame, made to fit over most glasses. Enjoy!

AIR

Air is a unique goggle of its kind as the goggle is designed without a frame. The lens is instead mounted directly on the soft protective foam which is resting against the face. The weight of the goggle is thus reduced and the pressure the goggles subjects to face is minimized. These super lightweight characteristics guarantee a comfortable fit in all situations.

Air is not as deep as more traditional goggles which means the goggle is closer to the face, enabling a very wide field of view.

Air is equipped with a double lens of high optical quality. The outer lens is made of unbreakable X-PC and the inner lens in Acetate with the best anti-fog treatment. All to make you feel safe while getting the best possible vision in varying weather conditions.

EDGE JUNIOR  
PRODUCT OVERVIEW

EDGE JUNIOR

A true favorite among users. Edge Junior combines high quality materials with optimal comfort and flexibility.

Full-frame model with optimized performance and perfect fit thanks to three layers of soft foam and 40mm head strap. Flexible side clips for perfect fit with face and helmets. Edge is equipped with a double lens of high optical quality. The outer lens is made of unbreakable X-PC material and the inner lens in Acetate comes with the best possible anti-fog treatment. Everything to make you feel safe while getting the best possible visibility so you can focus on your sport.

Edge Junior goes very well with regular glasses underneath (OTG).

JET

A visor helmet for kids. We call it Jet

WHAT TO WEAR

Bliz offers ski helmets for all occasions and different sports. The big range of Bliz products can sometimes make the choice of helmet and glasses difficult for the consumers. What should you consider when choosing protection?

The most important thing when you buy goggles and helmets is that they fit comfortably on the face and head. Try the goggle and helmet and find the correct size. The match between goggle and helmet should be perfect in the breakpoint of the forehead. Use a Bliz helmet together with a Bliz goggle for best result.

Bliz offers multiple helmets for different sports. You have the slalom helmets; Epic and Gravity. On both of these styles you are able to attach a chin guard. With its unique release system, you have the possibility to easily detach the chin guard, put it in your backpack and go for a free ride session. Flexibility at it's best.

We also have helmets for all other occasions, whether you are going downhill, giant slalom, ski cross, or just for a quiet nice ride in the regular slopes.

WHY BLIZ HELMETS

- ✓ Great flexibility
- ✓ Development of products are made together with the national teams in Alpine Skiing & Skicross.
- ✓ The wide range of products makes it easy and suitable for everyone, both in price and performance.
- ✓ Compatible with most goggles and on the market.
- ✓ Designed and developed in Sweden

TECHNICAL ADVANCED SPORTS HELMETS

PROTECT YOUR HEAD

Helmets are useful as safety gear to prevent injuries in an uncontrolled environment. If an accident would occur, a helmet can prevent or minimize injury to the head and brain. Bliz use high-tech and inovative material, pushing the limits in pursuit of the most secure sports equipment ever made.

STAY IN PLACE COMFORTABLY

Safety, design and comfort are the Bliz helmet statement. The design are made to appeal most people thanks to several different models and styles. On the inside we have a soft and warm inner lining that makes the helmet comfortable. Bliz helmets offers very good sound throughput for optimum balance and hearing. The helmets are always adjustable in size. Either by a size regulator or by the included padding kit.

## VOLT

### FULL CARBON HELMET

Bliz introduces a full Carbon FIS ski racing helmet with Mips. Designed to give the world's best alpine ski racers a distinct advantage in form of aerodynamics, weight and safety. Developed in cooperation with the Swedish Alpine Ski Team.

Ever since we started to develop helmets we have had a goal – Make one of the safest helmet ever made. With an appealing design, rapid and safe features, Volt has the perfect recipe and tools to revolutionize and become a legend in the world of Alpine Skiing.

The helmet is designed to pass the FIS standard and meet the high security demands of the world's best downhill skiers. Working with strong and reliable materials is the main priority to make a safe helmet. Calculations has been made and tested in a virtual world as well as real labs, getting to know and learn the different materials and their way of communicating with each other. Solid Carbon as shell material is extremely strong, light weight and safe in varying weather conditions. Together with the core material EPS and the reinforced low-density EPP inserts this helmet is one of the safest, most comfortably and fastest helmet ever made.

Bliz engineers has made and developed a unique combination that makes the helmet fit perfect with MIPS. MIPS is created to reduce and absorb rotational impacts, in case of an accident. Four important hazards in elite alpine racing; high-energy impacts, rotational energy, multi-impact crashes, and gate impacts. To fight these high and low-energy impacts racers often experience, we have made the helmet with test winning MIPS.

Learn more about MIPS Technology at: [bliz.com/MIPS](http://bliz.com/MIPS)

The helmet comes with a hard EVA case. The case contains a clever solution to store your helmet, goggles and spare lenses.

### 1. Full Carbon

Volt full Carbon brings ultra-lightweight and ultra-stiff characteristics all together. Benefits of the Carbon fiber shell material increase to a maximum level. Volt's impact resistance vs similar helmets without carbon are huge. Other benefits of the Carbon shell are low weight and compact design, ensuring a closer and more aerodynamic fit.

### 2. EPS Core

Bliz Volt has been equipped with a high quality EPS (Expanded Polystyrene) core to provide good protection.

### 3. EPP Reinforcements

The Bliz Volt helmet enhances the safety of its EPS core with focused EPP front and back inserts. EPP (Expanded Polypropylene), has great shock-absorbing properties and is a common and proven material in high-end helmets. The Carbon, EPS and EPP in combination gives you the ultimate protection.

### 4. Airflow Ventilation System™

Airflow Ventilation System was developed using low and high speed fluid dynamics studies to deliver the ideal airflow rates both within and around the helmet at every speed. The result is a helmet with air channels that delivers pleasant and effective ventilation that further enhances safety.

### 5. Emergency Quick Release System™

The Emergency Quick Release System™ provides a reliable, fast and easy way to detach the ear pads from the helmet, and thereby reduce pressure on the skier's head and neck if an accident should occur.

### 6. Easy strap release

Quick and easy attach/detach system for easy strap handling.

### 7. Rubber strap holder

Make sure the strap stays in place with the rubber strap holder. In addition you also minimize the injury risk by avoiding bulging parts on the helmet.

### 8. MIPS

MIPS is created to reduce and absorb rotational impacts, in case of an accident.

### Extra liner for customize fitting

Struggling with padding kits are a normal and annoying thing to do. With the included extra liner you are able to customize the size of the helmet even more, in an easy way.

### F.I.S approved

For the 2013/2014 ski race season, FIS introduced new ski helmet rules for all Downhill, Super G and Giant Slalom events on World Cup and standard FIS RH 2013 was required to compete. FIS high level security certification is needed in order to compete in the FIS World Cup at all time. An identification sticker should always be placed and seen on an FIS certified helmet.

### Hard EVA case

The helmet comes with a hard EVA case. The case contains a clever solution to store your helmet, goggles and spare lenses.

## EVO

### SLALOM/FREERIDE HELMET

Evo is the result of experience, testing and product development over successive generations.

**SLALOM**

**FREERIDE**

**AWESOMENESS**

Bliz EVO with MIPS is a versatile helmet, always ready for the ongoing happenings. Engineered and designed to meet the high demands regarding safety, looks and functionality. By cooperating with today's best racers and athletes. Getting to know the wearer and their equipment. Using each other to build a better product. Evo is the result of experience, testing and product development over successive generations.

Evo features a Hard-Shell Construction with a high impact resistance. Together with the core material EPS and the reinforced low-density EPP inserts this helmet is one of the safest, most comfortably and fastest helmet ever made.

With Evo's attachable chin guard solution the helmet has everything needed to conquer any Slalom course out there. For of the race track activities, remove the

chin guard and you have fully functioning everyday helmet for cruising, park riding and freeriding. Evo got your back!

Bliz engineers has made and developed a unique combination that makes the helmet fit perfect with MIPS. MIPS is created to reduce and absorb rotational impacts, in case of an accident. Four important hazards in elite alpine racing—high-energy impacts, rotational energy, multi-impact crashes, and gate impacts. To fight these high and low-energy impacts racers often experience, we have made the helmet with test winning MIPS.

Learn more about MIPS Technology at: [bliz.com/MIPS](https://bliz.com/MIPS)

### 1. ABS SHELL

Evo has an outer shell made of ABS (Acrylonitrile Butadiene Styrene), which is a good and strong plastic material, commonly used in helmets because of its high impact resistance and tolerance to cold weather.

### 2. EPS Core

Bliz Evo has been equipped with a high quality EPS (Expanded Polystyrene) core to provide good protection.

### 3. EPP Reinforcements

The Bliz Evo helmet enhances the safety of its EPS core with focused EPP front and back inserts. EPP (Expanded Polypropylene), has great shock-absorbing properties and is a common and proven material in high-end helmets. Evo's EPS core has been reinforced and enhanced with the EPP inserts to enhance its protective capabilities even more.

### 4. Airflow Ventilation System™

Airflow Ventilation System was developed using low and high speed fluid dynamics studies to deliver the ideal airflow rates both within and around the helmet at every speed. The result is a helmet with air channels that delivers pleasant and effective ventilation that further enhances safety.

### 5. Easy strap release

Quick and easy attach/detach system for easy strap handling.

### 6. Rubber strap holder

Make sure the strap stays in place with the rubber strap holder. In addition you also minimize the injury risk by avoiding bulging parts on the helmet.

### 7. Chin guard ready

With Evo's attachable chin guard solution the helmet has everything needed to conquer any Slalom course out there.

### 8. MIPS

Mips mimics the protective properties in the human brain and adds a layer of protection.

Less energy and force transferred to the brain equals more protection.

## RAID CARBON

The high-performance Raid Carbon is a racing helmet developed in cooperation with the Swedish Alpine Ski Team. The helmet is designed to pass the FIS standard and meet the high security demands of the world's best downhill skiers. Raid Carbon is an uncompromising helmet that operates with different materials in a unique way to provide maximum security for the rider. The Shell material is made from ABS and reinforced with Carbon Fiber for lightweight and high impact resistance. A carefully composed mix of EPP in combination with EPS for maximum absorption and protection from high impact in critical areas.

Besides all security aspects, Bliz Raid Carbon helmet has many details and features like; Quick release ear pads, removable and changeable neck pad, extra padding kit for perfect optimization and a Rubber Race Lining.

The helmet comes with a hard EVA case. The case contains a clever solution to store your helmet, goggles and spare lenses.

The helmet is considered a Class A helmet and meets the standard EN 1077.

EPIC

Epic is one of the first In-Mould slalom helmet with chin guard ever created. In-mould offers a light weight experience and high impact resistance. The chin guard is available as an accessory that features Bliz click-in system for easy mounting. **Attach or detach the chin guard in the blink of an eye, without any tools!**

Bliz Epic is a versatile helmet, it has everything needed to conquer any Slalom course out there. For off the race track activities, remove the chin guard and you have a fully functioning everyday helmet for cruising, park riding and freeriding down the mountain.

Epic is the result of countless hours of testing and development together with the Norwegian and Swedish Alpine Ski Teams. Cooperating with today's best racers and athletes makes us confident in what and why we do this.

Epic is engineered and designed to meet the high demands regarding safety, looks and functionality. The Shell material is light weight X-PC. The core material is made out of EPS and with its reinforced low-density EPP inserts, this helmet is one of the safest and most comfortable in-mould slalom/freeride helmets ever created. Epic - your new playmate in skiing.

1. Polycarbonate shell

Epic has an outer shell made of Polycarbonate, which is a lightweight and strong plastic material, commonly used in helmets because of its high impact resistance and tolerance to cold weather.

2. EPS Core

Bliz Epic has been equipped with a unique EPS (Expanded Polystyrene) core to provide better protection and hight impact resistance in a crash.

3. Airflow Ventilation System™

Airflow Ventilation System was developed using low and high speed fluid dynamics studies to deliver the ideal airflow rates both within and around the helmet at every speed. The result is a helmet with air channels that delivers pleasant and effective ventilation that further enhances safety.

4. Easy strap release

Quick and easy attach/detach system for easy strap handling.

5. Chin guard ready

With Epic's attachable chin guard solution the helmet has everything needed to conquer any Slalom course out there.

6. Strap buckle

Make sure your goggles stays in place with the buckle at the back of the helmet..

## GRAVITY

### PRODUCT OVERVIEW

#### GRAVITY

Gravity is one of the first In-Mould slalom helmet with chin guard ever created. In-mould offers a light weight experience and high impact resistance. The chin guard is available as an accessory that features Bliz click-in system for easy mounting. **Attach or detach the chin guard in the blink of an eye, without any tools!**

Bliz Gravity is a versatile helmet, it has everything needed to conquer any Slalom course out there. For off the race track activities, remove the chin guard and you have a fully functioning everyday helmet for cruising, park riding and freeriding down the mountain.

Gravity is used and favored by today's best racers and athletes because of the light weight.

Gravity is engineered and designed to meet the high demands regarding safety, looks and functionality. The Shell material is light weight X-PC and the core material is made out of EPS for high impact resistance.

Gravity is created with MIPS to reduce and absorb rotational impacts, in case of an accident. Four important hazards in elite alpine racing—high-energy impacts, rotational energy, multi-impact crashes, and gate impacts. To fight these high and low-energy impacts racers often experience, we have made the helmet with test winning MIPS.

ELEVATE WITH MIPS  
PRODUCT OVERVIEW

The high performance Elevate is a half aero cycling helmet developed in cooperation with the Swedish Cycling Teams.

The helmets design utilizes a unique combination of aerodynamics and low weight (330g) resulting in a significant improvement in performance. The effective Bliz Air Flow System™ excessively cools the wearer to enable comfort and stamina in both daily road rides and professional races. With multiple channels, the intake vents distribute the air evenly throughout the helmet, effectively cooling the wearer.

Elevate is made with safety as main priority and to meet the high security demands of the world's best cyclists. The helmet is adjustable in a 2-way direction for optimal comfort and fit.

Elevate is equipped with MIPS (Multi-Directional Impact resistance) to further enhance safety of the durable In-mold polycarbonate shell and EPS core.
