

# WINTER **AW20/21** COLLECTION

# PRECISION SINGLE LENS TECHNOLOGY

Nano Optic Lens - By combining different materials into one single lens Nano Optics gives you a great vision without any distortions that can be perceived in a standard double lens. Nano Optics also has a unique Anti fog treatment that is at least 3 times better than a standard double lens.

NO DISTORTION | 3X ANTI FOG

Nano Optic Lens - By combining different materials into one single lens Nano Optics gives you a great vision without any distortions that can be perceived in a standard double lens. Nano Optics also has a unique Anti fog treatment that is at least 3 times better than a standard double lens.

EXTREME CONTRAST | NO DISTORTION | 3X ANTI FOG

Nordic Light is a unique High Contrast lens for flat light and bad weather conditions. After long development and tests with the Swedish National Alpine Team, we are now proud to present these unique lenses, which will give the wearer a better clarity and performance. By reducing some of the blurry colors and strengthen the clear colors, of the visible light spectra, we have the result of "Nordic Light" lenses. They come in two options; Coral in Filtcat 1 and Begonia in Filtcat 2.

PHOTOCHROMIC | NO DISTORTION | 3X ANTI FOG

The photochromic lens function makes you ready for most situations since the lens changes after the condition of the weather, from a light filter category 1 lens which is great for night time or cloudy weather to a dark category 3 lens suitable for sunny conditions.

LENS FEATURES NANOOPTICS™

PRECISION CURVE

Every lens is cut out with perfection and accuracy providing minimized distortion in the field of view.

ANTI-SCRATCH

This drastically reduces the appearance of thin hairline scratches, keeping your lenses in perfect shape longer.

HYDROPHOBIC

The hydrophobic coatings keep rain, snow and water drops off the lens.

ANTI-FOG

Eliminates condensation and moisture on the lens, ensuring optimal fog free visibility in every condition.

SHATTER PROOF

Xtreamley lenses to resist impacts without causing any damage to your eyes.

OLEOPHOBIC

This greatly helps keeping the lenses clean from dirt and oily stains.

UV PROTECTION

The filter blocks harmful UVA- and UVB rays from reaching your eyes.

EXTREME CONTRAST

Extreme Contrast for Flat light and bad weather conditions, which will give the wearer a better clarity and performance.

PHOTOCHROMIC

The lens changes its shading automatically and instantly from light to dark and back again based on the weather condition.

NO DISTORTION | 3X ANTI FOG

## REVEAL YOUR TRUE ENVIRONMENT

Born and raised in the north. Shaped and molded by harsh and unforgiving environments. Approved by the real natives of Scandinavia. This is what led to the creation of Nordic Light.

Nordic Light is a unique high tech lens which considerably enhances the contrasts and colors, giving you clear and crisp vision in low light conditions and flat light. The lens removes the blurry colors between the blue and green, and between the green and the red wave-lengths. These selected colors are blocked by the Nordic Light lens, resulting

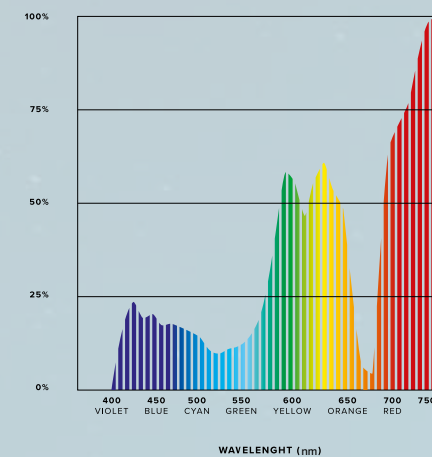

in a noticable improvement in contrasts and sharpness, even during the toughest weather conditions. Reveal your true environment.

Testing things in laboratory conditions is great. But what does that say about user experience? We have had the world elite in Alpine skiing test the lenses in the toughest possible environment. After getting their feedback, this is the end result. Nordic Light.

## REMOVE TO IMPROVE

Your eyes are amazing – but not always perfect. It's difficult to distinguish colors between the blue and the green, and the green and the red wavelengths. These crossovers are blocked by the Nordic Light lens, providing the carrier greater contrast and clarity in tough conditions.

### CORAL - AMBER

**Light transmission:** 49-51%  
**Category:** 1  
**Mirror:** Blue  
**Hydrophobic & Oleophobic**

Groundbreaking filt.cat 1 lens that enhances contrasts and blocks out destructive UV-light. These lenses cut out the blurry light in between the clear colors. Leaving the clear colors gives your eyes more comfort and better vision. The experience is that your visual perception is boosted and you see contrasts more clearly.

The soft and relaxing amber color gives your eyes the relaxation and contrast needed to keep focused all day long, especially in bad weather conditions.

BLIZ LENS TECHNOLOGY™

All Bliz Active glasses are equipped with Bliz Lens Technology to deliver precision lens sets of the highest optical standards. The materials and manufacturing techniques are selected to provide maximum safety and clarity, even in the harshest conditions. Whether it's a peaceful morning run through the woods, a daylong bike ride over a mountain pass, or a rapid descent down a snowy Nordic ski trail at sundown, Bliz Active lenses will keep you focused.

All Bliz Active lenses are made with Bliz X-PC, the virtually xtreamley Polycarbonate that complies with standard EN ISO 12312-1, AS/NZS 1067, and ANSI Z80.3 standards for high-mass and high-velocity impact. This state of the art lens material also delivers a 100% filter from harmful UVA and UVB rays.

Additionally, all Bliz lenses are molded with Bliz Perfect Curve Technology™ to provide no breaks or distortions in your visual field.

We offer three lens series' within which come with a multitude of lens shades. Bliz Nano Optics™ is our revolutionary top-end lens type with no distortion and 3x better anti-fog than a classic double lens. Nordic Light™ with lens technology that increases the contrasts. Bliz Hydro Lens System™ is our traditional model with a high optical quality for a clear vision.

Bliz Lens Technology delivers the highest quality solution for any weather, every light, all terrains, and every speed so you can keep focused on what's ahead.

NORDICLIGHT™

**Nordic Light™** Innovative lens technology that increases the contrasts and blocks the faded colors in between. Nordic Light provides the wearer with enhanced flat light visibility.

This lens also provide UV-PROTECTION, X-PC SHATTER PROOF, HYDROPHOBIC, ANTI SCRATCH and ANTI WATER.

NANOOPTICS™

**Nano Optics Lens** - By combining different materials into one single lens Nano Optics gives you a great vision without any distortions that can be perceived in a standard double lens. Nano Optics also has a unique Anti fog treatment that is at least 3 times better than a standard double lens.

HYDRO LENS SYSTEM™

**Bliz Hydro Lens Technology™** is our intermediate lens type. It delivers HYDROPHOBIC features, UV-PROTECTION, X-PC SHATTER PROOF, ANTI SCRATCH and when desired Multicoating or Polarized in one great lens.

NANOOPTICS™ NORDIC LIGHT

**Nano Optics - Nordic Light** is a unique lens with Extreme Contrast for flat light and bad weather conditions, which will give the wearer a better clarity and performance. By reducing some of the blurry colors and strengthen the clear colors, of the visible light spectra, we have the result of "Nordic Light" lenses. They come in two options; Coral in Filtcat 1 and Begonia in Filtcat 2.

NANOOPTICS™ PHOTOCHROMIC

**The Nano Optics - Photochromic** lens function makes you ready for most situations since the lens changes after the condition of the weather, from a light filter category 1 lens which is perfect for night time or cloudy weather to a dark category 3 lens suitable for sunny conditions.

## SWITCH

### Choose your ski mode

Switch is the next generation of ski goggles. Switch lets you customize fit and airflow more than ever before — adjustable airflow and nose. The switch is equipped with a unique NANO OPTICS™ single lens without any refractive error or light refraction. The NANO OPTICS™ lens combines the very best features in a single lens for unmatched visibility and clarity. With 100% UV protection. The side clips are adjustable in three positions to fit every helmet perfectly. Soft 3-layer foam with fleece for maximum comfort and easily replaceable lens. Silicone-treated strap and OTG-adapted for your regular glasses. Perfect for alpine skiing and free-skiing. Switch is the go-to choice when you refuse to compromise.

### Technical information

- Super easy lens change system
- Adjustable ventilation
- Adjustable nose part
- Lockable side clip in 3 positions
- 100 % UV protection
- 3 Layer foam
- Strap with silicone to keep your goggles in place over your helmet
- Soft Pouch included

FLOW  
PRODUCT OVERVIEW

## FLOW

### The Look of Speed

Flow ski goggles have long been one of the top models in Bliz range - and it's not hard to understand why. An appreciated and excellent model for alpine skiing and free-skiing. Flow has both a double lens with a wide field of view in high optical quality and a ventilated frame - no worries about fog and condensation. The outer lens is in durable polycarbonate with 100% UV protection, inner lens in acetate. The head strap comes with silicone for a safe and comfortable placement on the helmet. 3-layer foam with fleece provides high comfort, and you can wear your regular glasses underneath during OTG adjustment. With Flow, you maintain high speed on the slopes without missing anything.

### Technical information

- 100 % UV protection
- Double lens, inner lens in acetate with anti-fog and outer lens of polycarbonate
- 3 Layer foam
- Ventilated frame
- Strap with silicone to keep your goggles in place over your helmet

## NOVA

### Wide Angle Vision

Nova gives you a field of view beyond the ordinary. A result of many years of experience and cooperation with alpine skiers in the world elite. A model with a ventilated frame and double lens. The outer lens is made of durable X-PC with 100% UV protection and an acetate inner lens with fog protection that effectively gives you clear visibility in most weather conditions. Flexible side clips and silicone treated straps provide a great fit on the helmet. Wear Nova over your regular glasses; Nova is an OTG model. If you spend a few days on alpine skiing or free-skiing, you'll be comfortable with 3-layer foam. Nova has a unique frame that is made for one thing and one thing only - to maximize your field of view. See more than ever in the slopes with Nova.

## NOVA SMALL

Wide angle vision . For smaller faces

Nova Small gives you a field of view beyond the ordinary. A result of many years of experience and cooperation with alpine skiers in the world elite. A model with a ventilated frame and double lens. The outer lens is made of X-PC with 100% UV protection and an acetate inner lens with fog protection that effectively gives you clear visibility in most weather conditions. Flexible side clips and silicone treated straps provide a great fit on the helmet. Wear Nova Small over your regular glasses; Nova Small is an OTG model. If you spend a few days on alpine skiing or free-skiing, you'll be comfortable with 3-layer foam. Nova Small has a unique frame that is made for one thing and one thing only - to maximize your field of view. See more than ever in the slopes with Nova Small.

### Technical information

- 100 % UV protection
- Double lens, inner lens in acetate with anti-fog and outer lens of polycarbonate
- 3 Layer foam

## CARVER

### PRODUCT OVERVIEW

## CARVER

### Spherical Precision

Carver ski goggles are a reliable model with excellent performance. Ventilated frame and double lens of high optical quality reduces fog and condensation. The outer lens is made of durable X-PC with 100% UV protection and inner lens in acetate. Carver is an OTG model, so you can easily have your regular glasses under your goggles. 3-layer foam with fleece gives you high comfort. Flexible side clips for a great fit on the helmet, and the wide silicone-treated neck strap is easily adjusted so that Carver sits firm on your head even under tough rides. A good model for alpine skiing and free-skiing.

EVO

INFINITY

## EVO

Gates, trees, air

We have put years of work and refinement into Bliz EVO with MIPS. EVO is a versatile helmet in the highest division, developed together with a choice selection of elite athletes in ski sports. A helmet with in-mould construction with an ABS outside and an EPS inside with additional EPP reinforcements for the highest safety. The MIPS-technique gives your brain an expanded protection in the event of a crash, and the Airflow Ventilation System™ gives you an excellent airflow and comfort. The size is fine tuned with the chin strap and a dial in the neck. EVO also makes it possible to use a chin guard for slalom skiing. Are you looking for a great helmet for alpine skiing and free riding, that has top-notch comfort and safety? Then EVO MIPS is a great choice for you.

### Technical information

- MIPS system
- Chin guard ready
- Easy Strap Release
- Airflow Ventilation System™
- Hard-shell construction, ABS Shell and EPS core
- Rubber strap holder.
- Size adjustable
- A high quality Microfiber pouch is included

## INFINITY

Light, cool, comfort

Keep your cool with Infinity. Thanks to the Adjustable Airflow Ventilation System™ from Bliz, Infinity always has a great ventilation for heightened comfort and safety. An in-mould construction, providing the helmet with low weight, good comfort and high safety. The size is fine tuned with the chin strap and a dial in the neck. Keep your goggles in place with a strap in the neck and start the fun. Infinity is a good model for alpine skiing and free riding.

# VOLT

## VOLT

High speed carbon protection & performance

Bliz Volt. A world-class alpine speed helmet that excels in all areas, with limit-breaking performance. Volt is the result of testing in laboratories and wind tunnels, but also tests conducted with Ski Team Sweden Alpine. Volt has a shell in pure carbon fiber that offers low weight and a high level of safety. It has an EPS-core with EPP reinforcements. The helmet is also equipped with a MIPS system. The MIPS Brain Protection System (BPS) is designed to add protection against rotational motion transferred to the brain. Rotational motion affects the brain and increase the risk for minor and severe brain injuries. When implemented in a helmet, the MIPS BPS can reduce rotational motion by redirecting energies and forces otherwise transferred to the brain. Emergency Quick Release System™ makes the helmet easier to remove in the event of an accident. Volt meets and surpasses the requirements of FIS (Federation of International Skiing). This is a helmet for you if you demand the very best for alpine skiing. Volt has everything except compromises.

### Technical information

- MIPS System
- Full Carbon
- FIS Approved
- Emergency Quick Release System™
- Easy strap release.
- Rubber strap holder
- Extra liner for customized fitting
- A high quality Microfiber pouch is included

## RAID

High speed protection

If safety is your top priority in a helmet - Raid is the choice for you. Raid meets the high requirements of racing helmets set by FIS (Federation of International Skiing). A hard-shell construction with an outer shell made from ABS, and an EPS core with EPP reinforcements. In case of an accident the Emergency Quick Release System™ makes it easy to remove the helmet. Airflow Ventilation System™ gives you top-class ventilation at any speed. Raid also has a detachable neck pad, a rubber strap holder and the option of mounting a chin guard. For top level performance in alpine skiing and freeriding, Raid is the right model when safety is your main focus.

### Technical information

- FIS Approved
- Chin guard ready
- Airflow Ventilation System™
- Emergency Quick Release System™
- Easy strap release
- Hard-shell construction, ABS Shell and EPS core
- Rubber strap holder
- Extra liner for customized fitting
- A high quality Microfiber pouch is included

## BACKBONE

We've got your back!

Latest technology back protector with fully breathable mesh material and an ergonomically shaped foam liner for close-fitting.

The protector plate is made of a unique material that makes it soft and flexible when you are skiing or cycling, providing a comfortable ride all day long. In case of an accident, the plate stiffens, absorbing the impact for a high level of protection.

The Bliz Backbone protector keeps cyclists and skiers safe both summer and winter times.

Complies with standard EN 1621-2:2014

### Technical information

- Very comfortable protector that is soft when you wear it but becomes hard when you hit it
- Removable waistband up and down for great fit to every body
- Extra tail bone protector that is removable
- Stretch material in breathable mesh

## VISION PRODUCT OVERVIEW

## VISION

### For your eyes only

If you are serious about your sport, you are serious about your vision. This is why we have developed Vision with you in mind. A model so customizable that you can make it your - only yours. Vision is technically advanced with light weight and Jawbone technology. Nose pad and temples are easily adjusted for superb comfort. The big cylindrical lens has high optical quality and widens your field of view. Additionally, it has extraordinarily efficient ventilation. Vision is equipped with a Hydro Lens Tech™-lens, providing you with clear vision in different weather conditions. As a unique feature you can use an optical adapter that you can have adjusted to fit your eyeglasses prescription (can be purchased separately). Vision is a perfect choice for cycling, skiing and other demanding multisports. A chance to get customized vision suited to your personal conditions!

### Technical information

- Optical adapter available, for prescription lenses
- Jawbone Technology and an extra jawbone in different color included
- Including a nosepiece so you can wear it half framed
- Fits normal to wider faces
- Adjustable friction rubber nose pad
- Adjustable temple tips in rubber wire core
- Hydro Lens System™
- Hard protective case

## PEAK

## PEAK

### To new heights

Pick a mountain. Choose an activity. Feel safe and secure with Peak. A great looking pair of glasses that protect you from extreme lighting conditions. The detachable rubber parts let you efficiently block out any unwanted sunlight. Peak is especially suitable for people who spend time practicing sports and other activities at high altitudes and in strong sunlight. Peak is equipped with polarized or Nano Optic lenses. Enjoy every high altitude ride and hike with Peak.

#### Technical information

- Wrap around frame
- Side shield for extra protection from the sun
- Removable rubber parts
- Hydro Lens System™
- Adjustable friction rubber nose pad
- Adjustable temple tips in rubber wire core
- Extra neck cord
- Hard protective case

## PROFLIP MAX

Flip it down. Face the storm.

Proflip Max is the model for the riders who don't let a little bad weather slow them down. A radical design that changes the rules of the game. In heavy snowfall you use the folding visor to adjust the protection against wind and heavy snow. Carefully thought out details with the high level of protection and comfort. Three lenses are included, all with high optical quality and 100% UV protection. The neck strap keep Proflip Max firmly in place. This is a great choice for cross country skiing, biathlon/ski shooting and other demanding winter sports. Take control with Proflip Max.

### Technical information

- Foldable Visor
- 2 extra lenses, one contrast and one clear
- 20mm head strap
- Hydro Lens System™
- Hard protective case with pockets for extra lenses
